Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 39 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claim is directed to signals-per-se, a non-statutory category.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Araujo et al. (6,920,502).

5. Araujo teaches a method and system (abstract) of providing remote computing (col. 1, line 1 – col. 11, line 67) and access to applications (col. 12, line 1 – col. 13, line 5; col. 47, lines 60-67). In particular, a client sends requests including identifiers and receives responses from the remote applications (col. 13, line 5 – col. 15, line 45), through the usage of protocol conversion between session and non-session protocols (col. 15, lines 45-60; col. 18, lines 40-65), and through translation from a message to a series of commands (col. 17, lines 5-10; col. 17, lines 55-67). The requests include user inputs (col. 19, lines 40-60) and identifiers such as e-

mail addresses (col. 20, lines 35-45; col. 22, lines 20-50); and are stored in a database (col. 22, line 50 – col. 23, line 5), as are application code information (col. 33, lines 30-40). The commands are serialized and monitored (col. 23, lines 35-65) to determine if they are completed (col. 29, lines 5-45) or if they time out (col. 30, lines 20-25).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They regard further teachings on remote computing and application access, as well as protocol translation and user identification.
